## Recipe Of the Month by Natasha Beldjigerovska

Tres leches cake is a light, spongy dessert soaked in three kinds of milk, evaporated, condensed, and whole. It's popular across Latin America and the Balkans, with origins believed to be in Mexico. The result is a cake that's moist, sweet, and best served cold with a caramel.

- **Ingredients :**
- 6 eggs
- 100g white sugar
- 1tbs vanilla sugar
- 220g all-purpose flour
- 1tbs baking powder
- 1L whole milk
- 5dl heavy cream
- 4dl sweetened condensed milk
- Caramel(Optional)

### How I Make It

1. Separate egg whites from the yolks
2. Whisk the egg whites while adding both types of sugar until light and fluffy mixture is formed
3. Carefully add egg yolks while mixing
4. Once everything is well combined, slowly add dry ingredients
5. Mix on a low setting to keep a smooth consistency
6. Bake the batter at 200C for 10minutes. After, lower the temperature to 160C and bake for 20 more minutes
7. Remove the cake from the oven and proceed to poke holes before turning it over and poking holes on the other side.
8. Mix the 3 types of milk in a container and add half of the mixture to the cake. The holes help with milk absorption
9. Finally, you cover with foil to get that perfect moisture and leave in fridge for an hour to cool down.
